# 5. Live Share

- It helps the developers to collaborate on same projects from vs code itself.

Extension: Live Share - Responsivewebsite - Visual Studio Code

GoTopBtn.js Navbar.js Extension: Live Share X Home.js index.html App.js

**Live Share** v1.0.5788

Microsoft | 10,964,654 | ★★★★★ (138)

Real-time collaborative development from the comfort of your favorite tools.

Disable Uninstall

This extension is enabled globally.

[Details](#) [Feature Contributions](#) [Changelog](#) [Runtime Status](#)

## Microsoft Visual Studio Live Share

Visual Studio Live Share enables you to collaboratively edit and debug with others in real time, regardless what [programming languages](#) you're using or app types you're building. It allows you to instantly (and [securely](#)) share your current project, and then as needed, share [debugging sessions](#), [terminal instances](#), [localhost web apps](#), [voice calls](#), and more! Developers that join your sessions receive all of their editor context from your environment (e.g. language services, debugging), which ensures they can start productively collaborating immediately, without needing to clone any repos or install any SDKs.

Additionally, unlike traditional pair programming, Visual Studio Live Share allows developers to work together, while retaining their personal editor preferences (e.g. theme, keybindings), as well as having their own cursor. This allows you to seamlessly transition between [following one another](#), and being able to explore ideas/tasks on your own. In practice, this ability to work together [and independently](#) provides a collaboration experience that is potentially more natural for many [common use cases](#).

### Installation

1. If needed, install [Visual Studio Code](#) for Windows (7+), macOS (Sierra+), or Linux ([details](#)).
2. Download and install the Visual Studio Live Share extension for Visual Studio Code.

Published 1/29/2018, 23:34:53

# 6. Simple React Snippets

- It helps by providing the required React snippets to us.

The screenshot shows the Visual Studio Code interface with the Simple React Snippets extension installed. The extension is by Burke Holland, has 2,346,353 downloads, and a 5-star rating (26 reviews). It is described as "Dead simple React snippets you will actually use". The extension is enabled globally. The details page shows the extension's name, version (v1.2.7), and a description: "The essential collection of React Snippets and commands." The extension resources section includes links to the Marketplace, Repository, and Burke Holland's profile. The more info section shows the published date (9/12/2017), last released date (9/13/2022), last updated date (11/29/2022), and the identifier (burkeholland.simple-react-snippets). The code editor shows a snippet for a class component:

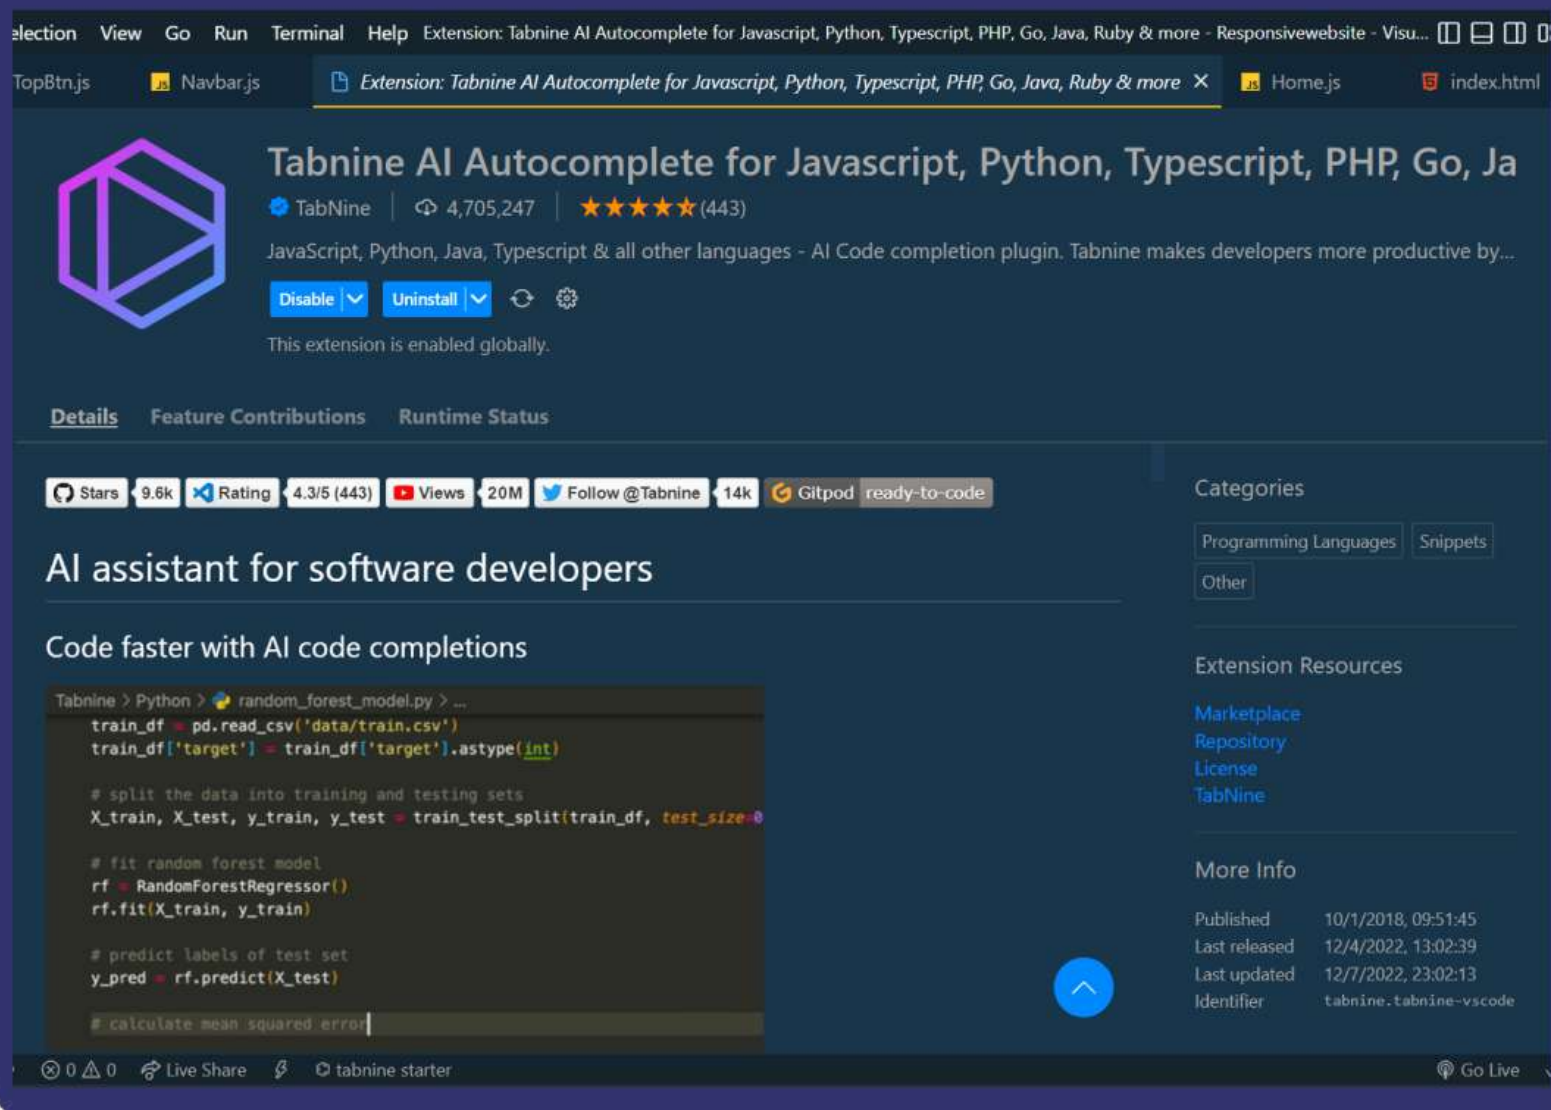

```
1 import React, { Component } from 'react';
2
3 class Album extends Component {
4   constructor() {
5     super();
6     this.setState({ a: });
7   }
8 }
```

The snippet is titled "az-func-node Node.js JavaScript function that execu..." and is categorized under "a: link".

# 7. Tabnine AI Autocomplete

- It helps by autoCompleting our code using AI.
- It supports Javascript, Python, Typescript, PHP and Go etc.

The screenshot shows the VS Code interface with the Tabnine AI Autocomplete extension installed. The extension is enabled globally and has a rating of 4.3/5 (443) with 4,705,247 downloads. The main section of the page is titled "AI assistant for software developers" and "Code faster with AI code completions". It features a code editor snippet for a Python random forest model. The right sidebar contains sections for "Categories" (Programming Languages, Snippets, Other), "Extension Resources" (Marketplace, Repository, License, TabNine), and "More Info" (Published, Last released, Last updated, Identifier).

# 8. Material Theme

- We can select many themes to use in vs code from this extension.

The screenshot shows the Visual Studio Code interface with the Material Theme extension page open. The top bar displays the menu (File, View, Go, Run, Terminal, Help) and the extension name 'Extension: Material Theme - Responsivewebsite - Visual Studio Code'. The breadcrumb trail shows 'GoTopBtn.js', 'Navbar.js', 'Extension: Material Theme', 'Home.js', 'index.html', and 'App.js'. The main content area features the extension's logo, name 'Material Theme' (version v33.6.0), author 'Equinusocio', and a star rating of 5 stars (20 reviews). It includes buttons for 'Set Color Theme', 'Disable', and 'Uninstall', along with a refresh icon and a settings gear. A message states 'This extension is enabled globally.' Below this are tabs for 'Details', 'Feature Contributions', 'Extension Pack', and 'Runtime Status'. The 'Details' tab is active, showing a large image of the extension's logo and the text 'Material Theme The original one.' To the right, there are sections for 'Categories' (Themes, Other), 'Extension Resources' (Marketplace, Repository, License, Equinusocio), and 'More Info' (Published, Last released, Last updated, Identifier).

# 9. JavaScript Snippets

- It helps by providing the required Javascript snippets.

The screenshot shows the Visual Studio Code interface with the 'JavaScript Snippets' extension page open. The extension is by Nathan Chapman, has 100,998 downloads, and a 4.8/5 rating. It is currently installed and enabled globally. The page includes tabs for Details, Feature Contributions, and Runtime Status. The 'Details' tab is active, showing the extension's description, setup instructions, and a list of snippets. The 'Setup' section explains how to install the extension and configure settings for snippet suggestions and tab completion. The 'Snippets' section states that the snippets are optimized to be short and easy to remember, following the JavaScript Standard Style. The right sidebar shows the 'Categories' section with 'Snippets' selected, and the 'Extension Resources' section with links to the Marketplace, Repository, License, and the author's profile. The 'More Info' section displays the extension's publication date, last release date, last update date, and identifier.
